Muscle Changes in Aging: Understanding Sarcopenia

Muscle physiology in the aging athlete is complex. Sarcopenia, the age-related decrease in lean muscle mass, can alter activity level and affect quality of life. This review addresses the microscopic and macroscopic changes in muscle with age, recognizes contributing factors including nutrition and changes in hormone levels, and identifies potential pharmacologic agents in clinical trial that

Evidence-based clinical practice guidelines for Liver

07/07/2021 · The diagnosis of sarcopenia is based on the Japan Society of Hepatology guidelines for sarcopenia in liver disease (Reference, CQ4-18). Measurement of grip strength is used to assess muscle strength. Muscle mass is assessed by skeletal muscle index based on bioelectrical impedance analyzer (BIA) or computed tomography (CT) scans at the lower border of the third lumbar vertebra (L3). Each
